

The background of the entire advertisement is a deep space scene. In the upper left, a portion of a planet is visible. A bright beam of light emanates from a point on the planet's surface, shining down towards a large, rectangular LED display that is tilted at an angle. This display shows a vibrant, colorful image of a spiral galaxy with a bright yellow and orange core and swirling blue and purple arms. An astronaut in a white spacesuit is floating in the space between the planet and the display. The overall atmosphere is one of high-tech exploration and immersive digital experiences.
